

CLIENTRI
CRM PLATFORM
Additional Features

Documented By ABHINAV KV

Clientri Additional Features (Others have)

1. Task Reminders and Notifications

The CRM system includes a task reminder and notification feature that ensures users do not miss important activities related to leads, customers, or internal tasks. The system automatically generates alerts for upcoming and overdue tasks.

Notifications can be delivered through multiple channels such as the dashboard, email alerts, or mobile notifications, helping users stay updated and organized.

Key Functions

- Reminders for upcoming tasks
- Alerts for overdue tasks
- Notifications for scheduled meetings
- Alerts for follow-up actions

This feature helps improve productivity and ensures timely communication with customers.

Reference: <https://knowledge.hubspot.com/tasks/task-reminders-and-daily-digest>

2. Email Templates

The CRM system provides email template functionality, allowing users to create reusable email messages for frequently used communication scenarios. This reduces the time required to compose emails and ensures consistency in communication with customers and prospects.

Common Use Cases

- Welcome emails for new customers
- Follow-up emails after meetings
- Sales proposals
- Customer support responses

Using predefined templates improves efficiency and maintains a professional tone across all communications.

Reference: <https://www.hubspot.com/sales/crm-ready-sales-email-templates>

3. Call Logging

The call logging feature allows sales and support teams to record and track phone calls made to customers or prospects. This ensures that all interactions are documented within the CRM system.

Information Recorded

- Call date and time
- Call duration
- Call outcome

- Notes and discussion summary

This feature helps teams maintain a complete communication history and improves collaboration among team members.

Reference: <https://www.hubspot.com/products/call-logging-app>

4. Team Productivity Reports

The CRM system provides team productivity reporting tools that help managers evaluate the performance of sales and support teams.

These reports analyze different performance metrics to identify high-performing employees and areas where improvement is needed.

Key Metrics

- Number of tasks completed
- Calls made by team members
- Meetings conducted
- Deals handled

These insights help organizations optimize workflow and increase operational efficiency.

5. Custom Report Builder

The custom report builder allows administrators and managers to generate personalized reports based on specific business requirements.

Users can select relevant data sources, apply filters, and define metrics to visualize meaningful insights.

Features

- Select multiple data sources
- Apply custom filters
- Choose performance metrics
- Visualize results using charts or tables

This feature provides flexibility in reporting and supports data-driven decision making.

6. Automatic Follow-Up Reminders

Automatic follow-up reminders notify users when it is time to reconnect with leads or customers. These reminders ensure that potential opportunities are not missed due to inactivity.

Example Scenarios

- After customer meetings
- After sending sales proposals
- When deals remain inactive for a certain period

This feature helps maintain consistent engagement with customers and increases the chances of successful conversions.

Reference: <https://www.zoho.com/mail/help/follow-up-emails.html>

7. Customer Journey Automation

Customer journey automation enables businesses to automate engagement with customers throughout the sales lifecycle.

This feature automatically triggers actions based on customer behavior or predefined rules.

Automated Processes

- Sending welcome emails to new leads

- Creating follow-up tasks automatically
- Sending sales notifications based on customer actions

Automation helps businesses maintain consistent communication and improves customer experience.

Reference: <https://www.zoho.com/one/customer-journey-automation.html>

8. Customer Support Module

The CRM system includes a customer support module that allows organizations to manage support tickets directly within the platform. This module helps support teams track issues, communicate with customers, and resolve problems efficiently.

Key Features

- Ticket creation and assignment
- Status tracking (Open, Pending, Resolved)
- Customer communication history
- Priority and category management

This module improves customer satisfaction by ensuring faster response and resolution times.

Reference: <https://www.salesforce.com/in/service/customer-service-software/>

9.Social Media and Email Marketing

The CRM system includes social media and email marketing features that allow businesses to communicate with customers and leads through multiple digital channels. Organizations can promote products, share updates, and maintain ongoing engagement with their audience through email campaigns and social media platforms such as Facebook, Instagram, LinkedIn, and X.

Key features include creating and sending email campaigns, scheduling social media posts, using customizable templates, personalizing messages with customer data, and tracking campaign performance through metrics such as open rates, click rates, and engagement.

This feature helps businesses reach a large audience efficiently and evaluate the effectiveness of their marketing strategies.

Clientri Additional Features - New

1. Lead Story Timeline

The Lead Story Timeline feature converts raw CRM activities into a clear, human-readable timeline that shows the complete journey of a lead. Instead of reviewing numerous activity logs, sales teams can quickly understand the history and context of customer interactions.

Example Timeline

- Jan 2 – Lead visited pricing page
- Jan 3 – Downloaded product whitepaper
- Jan 5 – Sales call with John
- Jan 6 – Mentioned budget concerns
- Jan 10 – No response to follow-up

Benefits

- Provides quick context of lead behavior
- Helps sales teams identify buying signals and objections
- Reduces time spent analyzing multiple activity logs

Implementation Concept

The system stores customer interaction events in a structured database table containing event details such as lead ID, event type, timestamp, and metadata. An AI summarization engine then processes these events and generates a concise story describing the lead journey.

2.Sales Focus Mode

Sales Focus Mode provides a simplified CRM interface designed to reduce distractions and help sales representatives concentrate on high-priority tasks.

Key Elements Displayed

- Today's follow-up actions
- Urgent deals requiring attention
- Expiring sales opportunities
- Overdue tasks

Example Interface

Today's Priorities

- Follow up with ACME Corp
- Send proposal to John
- Call warm lead from product demo

Benefits

Traditional CRM systems often contain complex dashboards with excessive information. Focus Mode prioritizes essential tasks, helping sales teams make faster decisions and improve productivity.

Implementation Idea

The system calculates a priority score for each task based on factors such as deal value, probability of closing, overdue tasks, and inactivity risk. Tasks are then sorted to highlight the most important actions.

3. Sales Team and Marketing Team Leaderboard

The CRM system includes a leaderboard feature that displays the performance of sales and marketing team members based on predefined metrics. This feature helps organizations

track employee achievements, encourage healthy competition among team members, and motivate teams to improve their performance.

The leaderboard ranks users according to their activity levels and results within a specific time period, such as daily, weekly, or monthly. Managers can easily identify top performers and reward employees who contribute significantly to business growth.

Key Metrics for Sales Team

- **Number of deals closed**
- **Total revenue generated**
- **Calls made to leads and customers**
- **Meetings scheduled or completed**
- **Follow-ups completed**

Key Metrics for Marketing Team

- **Number of campaigns created**
- **Email campaigns sent**
- **Social media posts published**
- **Customer engagement rates**
- **Leads generated from marketing campaigns**

The leaderboard can be displayed on the CRM dashboard, allowing team members to view rankings in real time. This feature improves transparency, boosts motivation, and helps managers monitor team productivity effectively.

GAP ANALYSIS OF CRM PLATFORMS

PROJECT:CLIENTRI

PRESENTED
BY:SAFA

INTRODUCTION

Customer Relationship Management (CRM) systems are widely used by organizations to manage customer interactions, sales processes, and business relationships efficiently. Many advanced CRM platforms are already available in the market, providing a wide range of features to support business operations.

For this analysis, we referred to well-known CRM platforms such as Salesforce CRM, Zoho CRM, and HubSpot CRM to understand the functionalities and capabilities provided by leading systems.

ABOUT US

- Clientri CRM is a customer relationship management platform designed to manage customer data and business interactions.
- It helps organizations track contacts, companies, leads, and deals in one centralized system.
- The platform includes modules such as tasks, calendar, email integration, and dashboards.
- Clientri also provides an AI assistant called Nia to help users perform actions and gain insights using natural language. [Clientri_UserManual](#)
- The goal of Clientri is to improve customer management, sales tracking, and team productivity.

MISSING FEATURES IN CLIENTRI CRM

1. EMAIL TEMPLATES

- Predefined email formats for common communication such as welcome emails and follow-ups
- Helps sales teams send messages quickly without writing emails repeatedly
- Maintains consistent and professional communication with customers
- Improves efficiency and saves time in customer interactions

2.TASK REMINDERS & NOTIFICATIONS

- Provides alerts for upcoming tasks, meetings, and deadlines to help users stay organized.
 - Notifies users about overdue tasks and pending activities, ensuring important work is not missed.
 - Helps sales teams maintain timely follow-ups with leads and customers.
 - Improves productivity and task management by keeping users informed about their responsibilities.
- 

3. CALL LOGGING

- Allows users to record and track phone calls with prospects and customers.
 - Stores important details such as call date, duration, discussion outcome, and notes.
 - Maintains a complete history of communication within the CRM.
 - Helps sales teams monitor follow-ups and maintain better customer relationships.
- 

4.CUSTOM REPORT BUILDER

- Enables users to create customized reports based on specific business needs.
 - Allows selection of data sources, filters, and performance metrics.
 - Supports data visualization through charts and reports.
 - Helps managers make better decisions using detailed insights.
- 

5.TEAM PRODUCTIVITY REPORTS

- Provides insights into the performance of teams and individual employees.
 - Tracks activities such as tasks completed, calls made, meetings conducted, and deals managed.
 - Helps managers monitor productivity and evaluate team efficiency.
 - Identifies high-performing members and areas that need improvement.
- 

6.CUSTOMER SUPPORT MODULE

- Manages customer issues using a ticketing system.
 - Allows teams to create, assign, and track support tickets.
 - Maintains customer communication and issue history.
 - Tracks ticket status such as open, pending, and resolved.
 - Helps improve customer support efficiency.
- 

7.SOCIAL MEDIA MARKETING

- Connect their social media accounts to the CRM
 - Create and schedule marketing posts
 - Respond to customer messages and comments
 - Track engagement such as likes, shares, and comments.
- 

UNIQUE FEATURES PROPOSED

1. SALES TEAM & MARKETING TEAM LEADER BOARD

- Encourages healthy competition among team members
 - Motivates employees to improve their performance
 - Helps managers identify top performers
 - Provides transparency in team performance
- 

2. SMART FOLLOW-UP TIMELINE

- Displays all upcoming follow-ups and scheduled interactions in a timeline format.
 - Helps sales teams track pending follow-ups with leads and customers.
 - Highlights contacts or deals that require immediate attention.
 - Helps improve sales efficiency and relationship management.
- 

3. LEAD JOURNEY STORY (AI ACTIVITY SUMMARY)

- Converts raw CRM activities into a simple, human-readable story.
 - Instead of showing many activity logs, the system summarizes the lead's journey clearly.
 - Displays key interactions like website visits, document downloads, calls, and emails.
 - Helps sales teams quickly understand the customer's interest level and behavior.
- 

4. SALES FOCUS MODE

- Provides a distraction-free interface for sales representatives.
 - Displays only the most important tasks and priorities for the day.
 - Shows today's follow-ups, urgent deals, and overdue tasks.
 - Helps sales teams focus on actions that directly impact revenue.
- 

CONCLUSION

- The proposed CRM system improves sales efficiency and customer relationship management.
- Automation and AI insights provide better decision-making and faster deal management.
- The system enhances customer engagement, transparency, and productivity.
- Overall, the platform helps businesses manage leads effectively and increase sales conversion rates.
- This next-generation CRM approach makes sales processes more intelligent, organized, and data-driven.

THANK YOU
